JL: Thanks for what Lloyd brought [illegible].

Re: CD 1347, the covering letter was not included and there appears to be no legitimate basis for the withholding of any of these papges that would not preclude the release of all that had been ~~xkxx~~ released.

There may be legal niceties lost upon me, but why should Hoover first and then all others perpetuate suppression of non-secret evidence on the far right while never withholding anything on, say, the FPCC?

For your information, the adding ot these pages still leaves the FBI not having reported an enormous amount that was public about Milteer et al. In Coup I had less than all, probably reduced in F-U.

As I remember it, the FBI withheld about the last 200 pages of CD 7 making the same mistake, not editing the index. The pattern is of protection of the far right. The names in the index indicate this ~~xxx~~ pattern.
